Category:Pascal software wgrant, you saw my upload of unzip? So are you going to make some use of it? NCommander: I was looking for it in the nightlies, but can't see it anywhere. wgrant, you wanna do some Chinese? :-) Or, I need to learn Chinese And I need some code to do it NCommander: It wasn't in the unzips? No, and the configure failed And I can't get it to configure cleanly now But if someone has a configure that works, I'll take it :-) And I can write it in Chinese ;-) Hmmm. I have some version in my unzips, but there's no such thing in the unzips-i386 or zips-amd64. But the binaries show up in the zips. wgrant, I uploaded it to lp But I can't get it to take I can do it again if you want NCommander: It's being built on i386. Which is probably why it didn't show up in the unzips. As in arch: all is being built for all-guts? Yes. Ok \* NCommander returns to the warm embrace of i386 wgrant, can I get you to test an upload against your PPA? NCommander: Yep. wgrant, wgrant, the build itself is failing, but the build log seems fairly normal wgrant, would you like me to test it on lpia? I'd need to get a little more time to work f678ea9f9e
